This Interest Rate & Loan Pricing Policy (“Policy”) is issued under the Master Direction – Reserve Bank of India (Non-Banking Financial Company – Scale Based Regulation) Directions, 2023 and aligns with RBI’s frameworks on Fair Practices, Penal Charges, Key Fact Statement (KFS), Digital Lending and Floating-Rate Resets. This Policy governs the pricing of all credit facilities offered by Quick Cashflow Capital Private Limited (‘QCF’ or ‘the Company’) and ensures fairness, transparency, customer protection and sustainability.

2. Objectives

- Price loans fairly and transparently with clear disclosure of APR, fees and charges.
- Align with RBI guidelines on Fair Practices, Penal Charges, KFS and Digital Lending.
- Apply risk-based, product-specific pricing that reflects cost of funds and expected losses.
- Provide borrowers with choices at floating-rate resets and ensure proactive communications.
- Publish indicative pricing ranges and penal charge norms on QCF’s website.

3. Scope & Applicability

Applies to all QCF credit products and channels, including:

4. Implementation

The Board may delegate certain operational aspects to the other relevant board / management committee as deemed fit by the Board of Directors in order to ensure effective implementation of the Policy on Interest Rate and Charges. Such a committee will determine the pricing range for different customer segments and products in accordance with this Policy on Interest Rate and Charges and recommend to the Board for its approval. The interest rates to be charged for different segments and customers will be decided by the business teams to be consistent with the range of rates approved by the Board. The business teams will take into account relevant factors, including the risk of the applicant defaulting on the loan, prevalent market conditions, competition and ability of the target customer base to service such interest while determining the rate to be charged within the range approved by the Board .

5. Pricing Methodology (APR Framework)

QCF adopts the Annualized Percentage Rate (APR) as the all-inclusive annual cost of credit to the borrower. APR includes interest, processing fees and other finance charges (and insurance, when bundled/mandated). Statutory taxes are excluded.

Pricing components

> Borrower Price (APR) = CoF + Tenor Premium + Operating Cost + Credit Risk Premium + Margin (+ Insurance, if applicable)

- **CoF:** Weighted average cost of borrowings.
- **Tenor Premium:** Long-tenor risk and reinvestment risk.
- **Operating Cost:** Origination, technology, servicing, collections.
- **Credit Risk Premium:** Probability of default, loss severity, cyclical/sectoral risk, bureau history, underwriting model outcomes.
- **Margin:** Target risk-adjusted return on capital, competitive positioning.
- **Insurance:** If credit-linked/mandated; optional covers are excluded from APR if unbundled, with borrower consent.

➤ APR computation

IRR on the **reducing balance** cash flows, incorporating all finance charges; computed at sanction and displayed in KFS and sanction letter.
